

Extend Material Master

ZMM01Z

Use this procedure to extend material master data to another plant.

Basic Commands

Back	
Cancel	
Help	
Exit	
Enter	
Save	
Execute	

1. From the **SAP Easy Access** screen or from your favorites, enter or select transaction code **ZMM01Z**.
2. Click or press **Enter**. The **Create Material (Initial Screen)** displays.
3. Enter **Material Number**; repeat material number in “**Copy From**” Material field.
4. Click or press **Enter**.
5. If **Select Views** appears, please return to the one-time setup guide and complete the one-time setup of **ZMM01Z**
6. If **Organizational levels** displays it should contain your plant data, if does not display your plant information return to the one-time setup guide and complete the one-time setup of **ZMM01Z**
7. If **Organization levels** displays with your information press enter.
8. The **Create Material xxxxxxxxxx (Semifinished products)** screen will appear.
9. Press **Save**
10. The system will return to the **SAP Easy Access** screen and a message in the status bar will state that the material has been created.

Notes

If a warning message is received on the **Create Material (Initial Screen)** stating “**You do not have the authorization to create a material**”, then the number you are trying to extend does not exist. Please recheck the DOT number you have entered.

The materials should now be extended to you plant. The item can be added to purchase orders (if it is already on a PO in BSIP, delete that line and add a new line for the item).
