

TOOL BAR FOR FLEETCROSS

EACH BUTTON REQUIRES A SINGLE CLICK WITH THE LEFT MOUSE BUTTON. ONLY THE DARKENED BUTTONS ARE ACTIVE AND ARE EXPLAINED BELOW.

TurboSearch+ Selecting this button will initiate the **TurboSearch+** screen. The screen displays VMRS codes, parts cross references, parts descriptions and applications. It also allows direct access to parts illustrations. **TurboSearch+** is activated by entering a part number or a word or abbreviation that describes a part.

TurboDoc Selecting this button will initiate the **TurboDoc** screen. **TurboDoc** leads to illustrations of parts, service instructions and bulletins.

TurboNote Selecting this button will initiate a **TurboNote** screen. **TurboNote** allows you to create a record of information on a particular vehicle or piece of equipment.

TurboFile Selecting this button will open a **TurboFile**, available for data input. The **TurboFile** collects all selections made from **TurboSearch+**. **TurboFiles** can be saved for later reference. They can also be changed or added to before being filed. After filing, they can be added to but nothing can be deleted.

SAVE Selecting this button will save the current **TurboFile** to a file folder. The software will automatically **Save** any **TurboFiles** created by equipment number.

PRINT Selecting this button will initiate the printer set up screen to allow the selection of a printer. A **Print** window will appear, allowing a printer to be selected. A preview is available and can be manipulated. The printer is used to print a TurboFile or a TurboNote

CLEAR Selecting this button will the **Clear** window.

DELETE ROW Selecting this button will **delete** the selected **row** in the **TurboFile** or in **TurboNote**.

INSERT ROW Selecting this button will **insert** a **row** in the **TurboFile** or in **TurboNote**.

SORT Selecting this button will initiate a pop up window to allow you to pick what order you would like you information sorted by on the **TurboFile** or **TurboNote**.

HELP Selecting this button will initiate the Content & Index **help** file for the software.
